Position Paper Call for Action on COP29-2024

CANSA AFGHANISTAN
Advocacy Call for Action at UN COP30
Belem Brazil, 10 – 21 November, 2025

COP30 WITHOUT AFGHAN VOICES:

A Climate Injustice to the World's Most Vulnerable

A Collective Call from Afghanistan's Climate and Environmental Civil Society Organizations under CANSA Afghanistan platform:

For the fifth consecutive year, the global climate summit COP30 is being held without Afghanistan's participation, without Afghan voices, and without representation from the communities living through one of the world's most severe climate crises.

While climate change is declared a universal and non-political challenge, in Afghanistan's case it has been politicized and silenced. The international community, prioritizing politics over humanity, continues to exclude Afghan experts, civil society, NGOs, and youth advocates from participating in global forums, depriving millions of vulnerable people of their right to be heard and represented.

This exclusion comes at a time when Afghanistan faces escalating climate emergencies: severe droughts, declining water resources, land degradation, floods, and recurrent disasters. According to national and international assessments (AAN, 2025), climate-related shocks cost Afghanistan an estimated USD 550 million annually, approximately 3.2% of its GDP and in drought years, losses surge to USD 3 billion, or nearly 18% of GDP. These figures translate into lost livelihoods, increased poverty, food insecurity, displacement, and irreversible environmental decline. The people of Afghanistan are paying the price of a crisis they did not create, while being denied access to solutions and global solidarity.

OUR CALL FOR ACTION AND JUSTICE

We, the undersigned members of the Climate Action Network South Asia (CANSA) – Afghanistan Chapter, representing national and International NGOs, experts, and community organizations, call upon the United Nations, COP30 Presidency, donor agencies, and the global climate community and also on the national institutions to act with fairness, justice, and conscience, now, not tomorrow:
